

GardenChoice and EHR are excited to introduce

Nepeta SylvesterBlue™

Available through Eason Horticultural Resources Inc.

GardenChoice

Breakthrough in Nepeta breeding...

- *Offers significantly larger blooms*
- *Outstanding container presentation*
- *More compact but sizes up quickly*
- *Prolific flowering*
- *Hardiness zones 3-8*
- *Blooms early summer through mid-fall*
- *Sun to part shade*
- *Picture tags available through MasterTag, see vendor specific programs for details*

Production Tips

- *PH 5.8-6.2*
- *EC (2:1 extraction): 0.7-0.9*
- *Fertilization: medium (150-200 ppm)*
- *Light requirements: high*
- *Water requirements: moderate*
- *Rooting temperatures: 68-72F*
 - *rooting from URC: 7 days*
- *Growing on temperatures: 55-70F*
- *Pinch at transplant*
- *Suggested 1-3 rooted plugs per container*
- *Finishing time*
 - *4.5" or quart 4-5 weeks*
 - *6" or gallon 5-6 weeks*
- *18" tall x 24" wide*
