

Hibiscus MoonShadow™ PPAF UPAF

Breeder: Rick Grazzini, GardenGenetics

Zone hardiness: Zone s 5-9

Bloom time: Summer through fall

Habit: Upright

Branching: Densely branched

Flower form: Single

Height: 4' tall

Spread: 4' wide

Spacing: 5'

Exposure: Performs best in sun.

Water: Prefers regular moisture, but will tolerate dry conditions.

Fertilizer: (during liner / container growth): 150-200 ppm N, constant

PGR: if required, drench with 1 ppm uniconazole (Sumagic)

pH: 6.0 -6.5

EC: 2.5 – 3.5

Temperature for rooting: 68-70 F

Pinching: Pinch at transplant, then as needed.

Pests: Tolerant (not attractive) to feeding by Japanese beetle and sawfly

Disease: None

Emergence: Early to emerge from dormancy (3-4 weeks earlier than typical)

Flowering: Earlier to flower than typical (decreased daylength sensitivity)

Always follow label instructions carefully.

Test on a small portion of the crop prior to widespread application.

Hibiscus
MoonShadow™ Morello

Hibiscus
MoonShadow™ Rosita

Looking for a variety for earlier sales opportunity?
MoonShadow™ emerges 2-3 weeks earlier than other commercial moscheutos, which expands the sales window. In addition to early emergence they produce multiple shoots, filling pots quickly. Don't worry, this compact variety is sturdy & densely branched.
