

## Leucanthemum FlowerPower™

**Breeder:** Brent Horvath, Intrinsic Perennials

**Zone hardiness:** Zone 4 -9

**Bloom time:** Summer through fall, approx. weeks 26-40+

**Habit:** Groundcover

**Branching:** Densely branched

**Flower size:** 2-3"

**Flower form:** Single

**Height:** 18-24" high

**Spread:** 24-32" wide

**Spacing:** 24-30" apart

**Exposure:** Performs best in sun.

**Water:** Prefers and performs best with even moisture.

**Fertilizer:** Moderate 150-200 ppm

**PGR:** Not recommended if grown cold. If necessary, 2,500 ppm daminoside (B9) spray, or 20-25ppm paclobutrazol spray.

**pH:** 5.8-6.2

**EC:** EC 0.5 – 1.8 (50-150 ppm)

**Temperature for rooting:** 65-72°F

**Pinching:** Pinch at transplant, then as needed.

**Scheduling:** URC root in 7-14 days, plugs ready for transplant in 14-28 weeks.

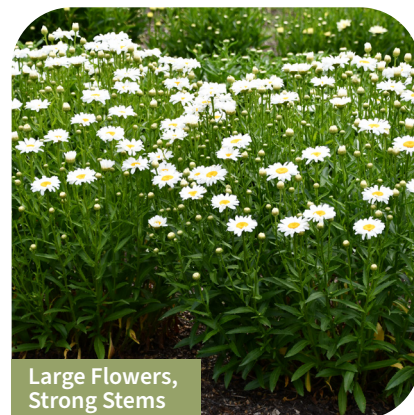

Plant 1 plug per qtf or finish in 8-10 weeks, 1 plug per 1 gallon for finish in 12-14 weeks

**Pests:** Scout for aphids, two spotted spider mites & flower thrips

**Disease:** Watch for fusarium & root rots.

Always follow label instructions carefully.

Test on a small portion of the crop prior to widespread application.

Large Flowers,  
Strong Stems

Ideal 1 Gallon Crop

1<sup>st</sup> Year Flowering

This is a mostly sterile Leucanthemum, with a high tolerance to botrytis.

Leucanthemum FlowerPower™ features large and vibrant single white flowers on short, strong stems. FlowerPower™ is produced from stock plants which are certified tested clean from crown gall diseases.
