

'New Moon'

ALLIUM

What makes 'New Moon' distinctive?

Glance at this new moon more than just once a month! The latest ornamental onion Allium 'New Moon' stands out with its large and long bloom times and striking blue-green foliage measuring about 3/8" wide. This plant showcases lavender-colored flowers from mid to late summer. Standing tall on 12-15" stems, it thrives in full sun and some light shade. This late bloomer will add a pop of color to any garden!

Resilient and Resistant

Can withstand drought and needs little to no maintenance while being resistant to deer and most rodents.

Unique Full Shape

Full and spherical flowers are the perfect contrast to other plants in gardens and bouquets.

Eye-Catching Color

The lavender flowers are bright while creating a calm environment complimenting the blue-green foliage below.
